ARTS THREAD

Creative Graduates: What is the Future Now?

The **CHEAD Annual Conference** creates an opportunity to discuss the critical issues facing art and design education across the UK in 2023.

The conference contains three interwoven strands of discussion that will facilitate, promote, and enhance debate around some of the core issues that we are all facing within Art Schools and across all creative subject areas.

- Equality, Diversity and Inclusion: at the heart of everything we do

- Sustainability: and the creation of sustainable futures

- Future Skills: Proposing change, challenging educational policies and securing futures
