Want to do more?

For the option of bespoke live streaming/edited videos of talks, shows, exhibitions, catwalks, promotional tours, events, lectures, student-making videos, etc. please contact us for information and costs.

davidmahoney@artsthread.com

1. Why should we have an online portfolio area on our University/School website?

This is to ensure that your graduating students can be found and have greater opportunities to gain employment or start their own business as artists & designers.

All content can be curated by the Institution.

2. What do we receive?

Arts Thread will build a bespoke plug-in for your Institution which will house as many portfolios as you wish, where you can search by course/program, specialism and name of student.

3. Why have a portfolio plug-in for our end of year showcase?

For those who cannot attend the physical end of year show the online showcase is critical exposure for the graduating students – increasing their job opportunities, brand profile and also the Institution's reputation.

4. Is it easy for the students to upload?

We have been running a portfolio website for over 10 years and we have made the process very simple. Over 75,000 students from around the world have uploaded. There is also a FAQ/direct email address/telephone service for students needing assistance.

5. Can the page look just like our Institution website?

Yes, we can add colour branding and intro text to the plug-in so it displays as if it is part of your website.

6. How hard is it for our IT team to add this plug-in to the website?

This is very easy to do and works with all content management systems. It would take a member of the IT team no more than 10 minutes to install.
